

**Biometric  
attendance system  
via radio frequency.  
The safest modern  
way to control the  
company's  
productivity**

**RIMAX STAFF ON TIME® Retail RFID**

Staff on time® Retail RFID is a very simple and economic solution for Human Resources Management, based on a proximity reading terminal (RFID). It is able to read the card at a distance of 5cm so the card doesn't need to be in contact with the terminal (Contact less technology).

The employees have to pass the card in front of the terminal's sensor which will beep, after recognising the card, to notify the user about the result of the signing up (entry, exit or error). The staff on Time Retail RFID is connected via an USB flash drive to a PC or a Staff on Time Server\*, therefore its use and setting up are extremely easy.

The solution Staff on Time Pro BIO-I includes the complete Staff on time ® version. This software includes three modules: Staff on time® admin. (Management and administration module, Staff on time ® ID (module of biometric recognition) and Staff on time ® Info (listing of the users' attendance).

**Characteristics:**

- Up to 2.100 employees\* (\*cards are included for 20 employees).
